is a family owned business, dedicated to constructing the highest quality home in the area. We have a hands on approach, so that we can ensure the highest quality.

Stonecraft is a dedicated energy efficient construction company. We have willingly sought out a standard above all local and state standards to construct our homes too. The standard we use is the EarthCraft House program. It is a holistic program looking at the whole house and all aspects from the land to the structure.

Stonecraft Construction was created by Danesh Foroughi, who envisioned a construction company that pushed the envelope in areas of energy efficiency and structural design.

We work with each customer to create their Dream Home!

ICF* CONSTRUCTION

What is ICF construction?

ICF (Insulated Concrete Form) Construction is an alternative to standard framing, that provides numerous more benefits. The insulating capacity of ICF polystyrene technology, combined with the structural strength and thermal mass of concrete makes Stonecraft walls stronger, safer, more comfortable and more energy efficient than typical residential walls.

ICF built homes are 10 to 20 times stronger than stick framed homes. Providing unmatched safety and able to weather a tornado, earthquake or moderate hurricane virtually un-scathed. Make your dream home a home meant to last.
