

A Decade of Performance

SEALECTION® 500 Spray Foam Insulation Provides Superior Results

Environmentally Friendly – **SEALECTION® 500** contains no ozone-depleting chemicals, fibers or asbestos.

Energy Efficiency – Airtight seals eliminate convection currents, the leading cause of heat loss; and maintain a comfortable constant temperature that results in greater energy efficiency.

Lower Expenses for Builders – High-performance insulation allows contractors to right-size their HVAC systems. In most cases, smaller units can be used to heat and cool the same amount of space. In some cases, the reduction in HVAC tonnage can be as much as 40 percent.

Lower Expenses for Owners – Price-conscious consumers enjoy the lower energy costs created by smaller heating and cooling units. In some cases, heating and cooling costs have dropped by as much as 50 percent.

Quieter – Noise pollution is reduced because airborne noise can no longer seep through walls. Areas where the difference will quickly be appreciated include offices, classrooms, master bedrooms, laundry rooms, media rooms and plumbing runs.

Healthier – An airtight seal means that dust, dirt and germs have nowhere to go, so indoor air quality is healthier and cleaner than the outside air.

Dependable Performance – Spray foam insulation maintains peak performance because it never deteriorates or decomposes due to time, temperature or usage.

Cleaner, Healthier, Quieter

SEALECTION® 500's airtight seal creates a healthier, cleaner, more comfortable environment by preventing air from entering or circulating through the building cavity. Less air movement means inside air carries less dust, dirt, allergens and pollens.

SEALECTION® 500 helps create a quieter and more pleasant atmosphere because it absorbs unwanted noises from outside, as well as interior adjoining rooms. So whether it comes from outside traffic, noisy neighbors or adjoining rooms, intrusive noise stays where it belongs.

SEALECTION® 500 Delivers Performance, Convenience and Savings

For more than a decade, **SEALECTION® 500** has been an environmentally friendly, easy-to-apply spray foam insulation that delivers superior performance and money-saving benefits to builders, contractors and owners. It allows builders to use smaller, more energy-efficient units to heat and cool their buildings; lets contractors conveniently and quickly install and custom finish their insulation; and offers consumers lower energy costs and a healthier, cleaner interior environment.

Environmentally Safe. Earth Friendly.

SEALECTION® 500 was created with the environment in mind. Its unique formula contains no ozone-depleting chemicals, CFCs, HCFCs, fibers, formaldehyde or asbestos. No toxins are emitted during preparation and installation. And since it never decomposes or deteriorates, there are no worries about harmful fibers or gases escaping into the air in the future.
